

Animated React component ideas

DRI: Adam

Context: We want to create a library of animated components that we can use on our site. We already have a handful of components today, visible at Thatch.ai:

- A budget slider
- A pair of cards that slide apart
- An illustration showing how a budget could be applied across a different set of people

We want more of these that we can use on our homepage and various landing pages to create a polished, custom look.

[See this loom for a walkthrough of the product and which animations we'd like](#)

Component 1: Payroll (2)

- Moving payroll logos (circling, etc.)
- Authentication animation (entering an email address and password, followed by a confirmation message/check)
- Different payroll logos funneling into a Thatch logo somehow

Component 2: Budget (3)

- Animated map, showing an input someone types a city into, then a state being highlighted, along with a price
- New variant of the budget slider
- Input elements that employers can populate with zip code, age, and dependent information, incrementing a total budget at the bottom

Component 3: Using the Thatch budget in flexible ways (3)

- Similar to the component at the top of Thatch.ai, we want to show different people using a budget in different ways. E.g. person 1 spends \$400 on health insurance via Oscar, then \$100 on prescriptions, then \$30 on copays. Person 2 spends \$550 on health insurance with United, then \$200 on therapy. Etc.
- Different logos (CVS, One Medical, Ezra MRI, Mindbloom, etc.) circling around a Thatch logo in the middle.

- A component representing the completed view that a member sees after onboarding (“here are your selections” page), with line items for different amounts and a budget remaining

Component 4: Thatch dashboard elements (3)

- Animated charts for healthcare spending amounts over time, or spending categories
- Animated employee roster, showing the team being populated
- Transaction list, scrolling through different items

Component 5: Thatchbot/sms (2)

- Improvement to the animated SMS stuff on thatch.ai, showing messages back and forth

Component 6: Animated cards (1)

- A new variant of the animated cards on [Thatch.ai](https://thatch.ai)

Component 7: Plan selection (2)

- Animated scrolling plan cards
- Something to represent searching/filtering plans
